Re: GN Docket No. 09-51  
A National Broadband Plan for Our Future

Dear Ms. Dortch:

On September 18, 2009, Tony Bates, Senior Vice President and General Manager, Enterprise, Commercial and Small Business, Cisco Systems, Inc. and the undersigned met with Blair Levin, Eric Garr, Kristen Kane, Nick Sinai, Mohit Kaushai, Eugene Huang, Elana Berkowitz, and Andrew Nesi to discuss the National Broadband Plan.

The topics discussed at this meeting were consistent with Cisco's past filings in this docket, including the need for a robust National Broadband Plan with strong goals. Specific topics covered in this meeting were the possibility of a TelePresence plan for Federal Government operations; the architectural framework needed to support advanced collaboration tools; transforming healthcare through broadband applications and related cost savings; improving the efficiency of government operations; meeting the broadband needs for telework; the speeds and quality of broadband connections necessary to support advanced broadband applications; and the importance of highly managed broadband networks to support applications such as TelePresence, HealthPresence, telemedicine, and telework.

Please direct any questions relating to this filing to the undersigned.

Respectfully submitted,

---

Jeffrey A. Campbell  
Senior Director, Technology and Trade Policy
